■ PROFILE

Operations professional with 8+ years running procurement, government tendering, billing/VAT compliance, and inventory management for a healthcare supplies business in Nepal. I've spent the last ~1 year teaching myself to build software (AI-assisted) to automate that same work. I'm not a traditional software engineer — I'm a domain expert who builds the tools my job needs, and increasingly wants to build them for others. Comfortable in both worlds: closing a hospital tender and shipping a working internal tool in the same week.

■ EXPERIENCE

K & K Trade Concern — Kathmandu, Nepal

2017 – Present

Office lead role (functional scope — no formally conferred title) • ~2022 – Present

- Run day-to-day operations of a 6-person healthcare-supplies office single-handedly: government tenders, quotations, VAT/PAN billing, import/export documentation, inventory, and supplier coordination for surgical, laboratory, orthopedic, and X-ray equipment.
- Processed roughly NPR 2 crore in bills, quotations, and tender documentation in a single month — the highest volume handled that year — including 15–16 hospital tenders (Manthali & Ramechhap Hospitals) totaling approximately NPR 1 crore in quotation work.
- Redesigned goods-pickup routing and restructured the billing/dispatch workflow (challan-before-bill); customer complaints about incorrect goods dropped sharply as a result.
- Built and now use four internal software tools in this role — an ERP system, a business ledger, a quotation/bhuktani document generator, and a challan/billing manager — to replace what was previously all-manual Excel work (see Projects).
- Manage staff attendance, organize office logistics and events, and handle procurement of office equipment and supplies.
- Carry the fiscal year-end closing period (~June–July), Nepal's highest-pressure business window, including working from home to keep pace with government demand.

Office Executive Handler • ~2019 – ~2022

- Broadened from accounting into day-to-day office execution; used a commercial ERP-style billing/inventory system (“Navigator”) — direct hands-on exposure that later motivated me to build my own ERP.

Accountant • 2017 – ~2019

- Joined while in the 1st year of my Bachelor's degree; handled core accounting and financial record-keeping.

Earlier

- School Teacher, ~1 year (following Higher Secondary Education)
- Online AdSense Trainer, ~1 year — taught students to set up and monetize AdSense/Blogspot/YouTube accounts; also completed task-based freelance work on Upwork and Microworkers during this period.

■ SELECTED PROJECTS

KK Challan Manager v4 — Desktop App (React/Vite + Electron)

In production use

- Replaced manual Excel-based challan and billing management with a working desktop tool actively relied on at K&K — my one project in verified day-to-day use, not just self-tested.

Nepal ERP — Flask + PostgreSQL + React + Electron

Self-built, trial phase

- Full ERP built to replace my own ~8-hour daily Excel workflow (billing, quotations, tenders, inventory) with a ~1–2 hour workflow; self-tested, still being upgraded.

KK Ledger — HTML + Firebase

Deployed, in use

- Replaced manual Excel ledger entry with an auto-updating, searchable ledger, and gave ownership mobile access to live business data for the first time.

Quotation Generator — Electron (English + Nepali)

In use

- Single tool generating quotation, bhuktani, and suchi darta documents — all formatting, stamp-placement, and layout logic self-designed to match real tender-document requirements.

Multi-Utility Tools — Static web toolkit

Public, GitHub Pages

- Toolkit including a Bikram Sambat ↔ AD date converter built to solve a recurring problem in my own document work, later expanded into a broader set of calculators and converters.

SKILLS

TECHNICAL

Python · JavaScript / TypeScript · SQL
React · Tailwind CSS · Flask
PostgreSQL · Firebase
Electron · GitHub · AI-assisted development

DOMAIN

Government tendering & procurement
VAT/PAN billing & compliance
Import/export documentation
Inventory & supplier coordination

EDUCATION

B.Sc. Physics — Tri-Chandra College (affiliated with Tribhuvan University), Kathmandu
Higher Secondary Education (Science) — 2014 | School Leaving Certificate — 2012

CERTIFICATIONS

Database Management System (SQL) Course — Code IT, Jan 2026 | Python Course — Code IT, Feb 2026 | 5-Day AI Agents Intensive Course — Kaggle × Google, Dec 2025 | Introduction to Python, Apr 2025
